

S. Prince Management Tool – Complete System Requirements

1. Complete System Overview

The S. Prince Management Tool will provide a centralized system for managing tenders, projects, subcontractors, employees, and financial information. The management dashboard will provide an overall view of important business activities and pending items.

Dashboard

The dashboard will display:

- Active Tenders
- Upcoming Tender Deadlines
- Won / Lost Tenders
- Active Projects
- Project Value
- Subcontractor Work
- Subcontractor Pending Payments
- Employee Count
- Salary Pending
- PF Status
- GST Due / Filed Status
- Customer Receivables
- Overall Revenue / Expenses

2. Tender Management

Tender Register

The system should maintain the following information for each tender:

- Tender ID
- Organisation
- Tender Name
- Work Description
- Tender Value
- EMD
- Tender Fee
- Submission Date
- Opening Date
- Eligibility
- Documents
- Tender Status

Tender Status Workflow

New → Under Evaluation → Bid Preparing → Submitted → Won / Lost

The system can also provide reminders for upcoming tender submission deadlines.

3. Project Management

Once a tender is won, it can be converted into a project.

Tender → Project

Project Details

The system should maintain:

- Client
- Work Order
- Project Value
- Start Date
- End Date
- Site
- Project Manager
- Work Status
- Progress
- Billing
- Payment

This will allow the company to track the project lifecycle from tender award through project completion.

4. Subcontractor Management

Subcontractor management is an important part of the system for S. Prince.

Example

Project A – ₹50 Lakhs

The project may have multiple subcontractors:

- Civil Work – Subcontractor A
- Stone Picking – Subcontractor B
- Painting – Subcontractor C

Subcontractor Details

The following information should be maintained for each subcontractor:

- Company / Name
- Contact Details
- Assigned Project
- Assigned Work
- Contract Value
- Work Start Date
- Work End Date
- Work Progress
- Bill Submitted
- Bill Amount
- Paid Amount
- Balance
- Payment Date
- Documents

Subcontractor Dashboard

The dashboard can display:

- Subcontractor Payable
- Work Pending
- Bills Pending

This will help management track subcontractor work, submitted bills, and pending payments.

5. Employee Management

Employee Information

The system should maintain:

- Employee Master
- Designation
- Department
- Joining Date
- Salary
- Attendance
- Advance
- Deduction
- PF
- ESI, if applicable
- Net Salary
- Payment Status

A payroll dashboard can also be provided to give management an overview of employee salary and payment status.

6. GST and Finance

The system is not intended to replace a dedicated GST or accounting system. Instead, GST and financial information can be maintained as a business tracking layer within the management system.

GST and Invoice Details

The system should maintain:

- GSTIN
- Invoice Number
- Invoice Date
- Customer
- Taxable Value
- CGST
- SGST
- IGST
- Total
- Payment Status
- GST Filing / Reference Status
- Due Date

Management Dashboard

The dashboard can display:

- Invoice Outstanding
- GST-related Items Pending

This will provide management with a quick overview of outstanding invoices and pending GST-related activities.
